

COMMUNITY BLESSINGS

by Roopa Vasudevan & Diana Huang

‘LIGHTING’ A CANDLE

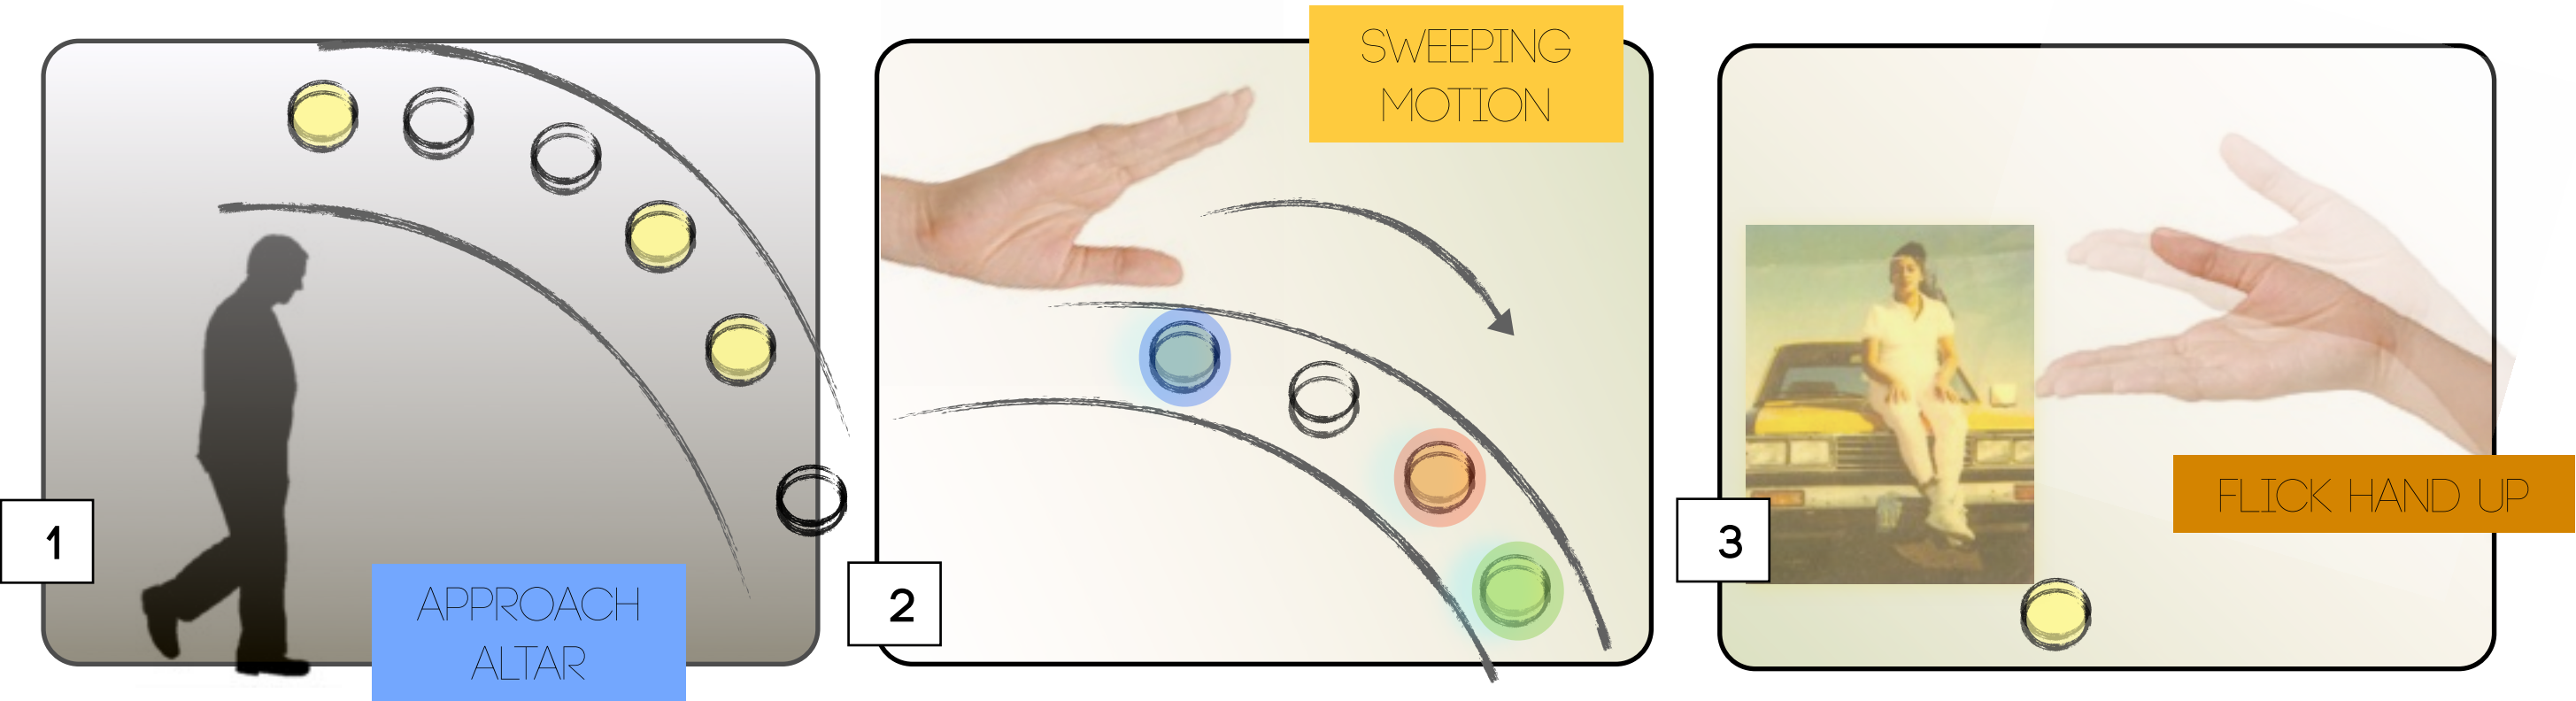

User approaches the candle altar to light a candle for a prayer intention.

User selects a free candle by touching the surrounding area - The color gradually changes through a series of colors, representing various categories of intentions (i.e. blue for a family member, green for a spouse/loved one, etc.) until the correct color is reached. The intention color disappears until called later but at this point, the candle is ‘lit’.

User can choose to record a sound piece or pass in a photo and link it to the candle. At the center of the altar is a media recording area - the User can either wave a photo in front of the camera, or speak a short audio piece linked to the camera.

EXPERIENCING THE CANDLES

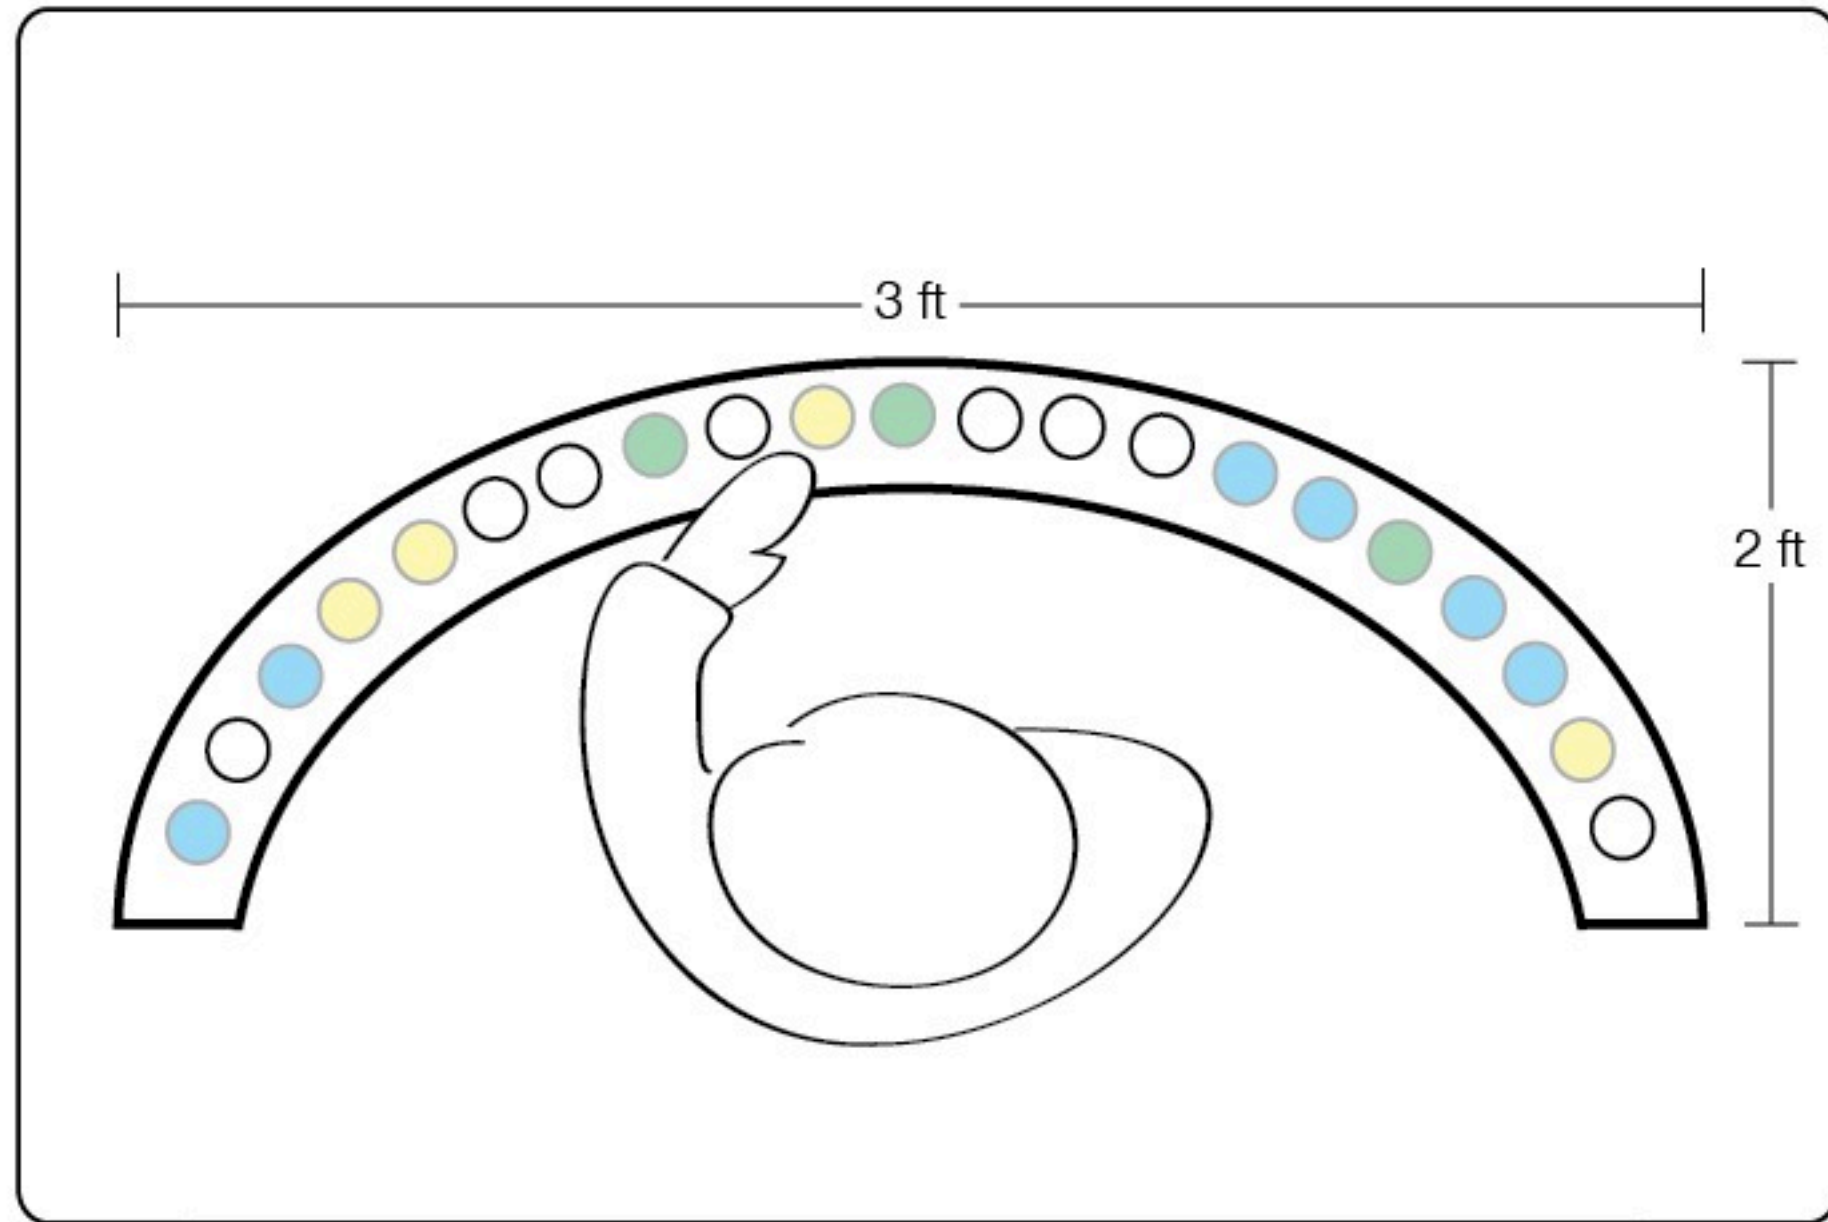

User approaches the candle altar to get a feel for the prayers and wishes of the community.

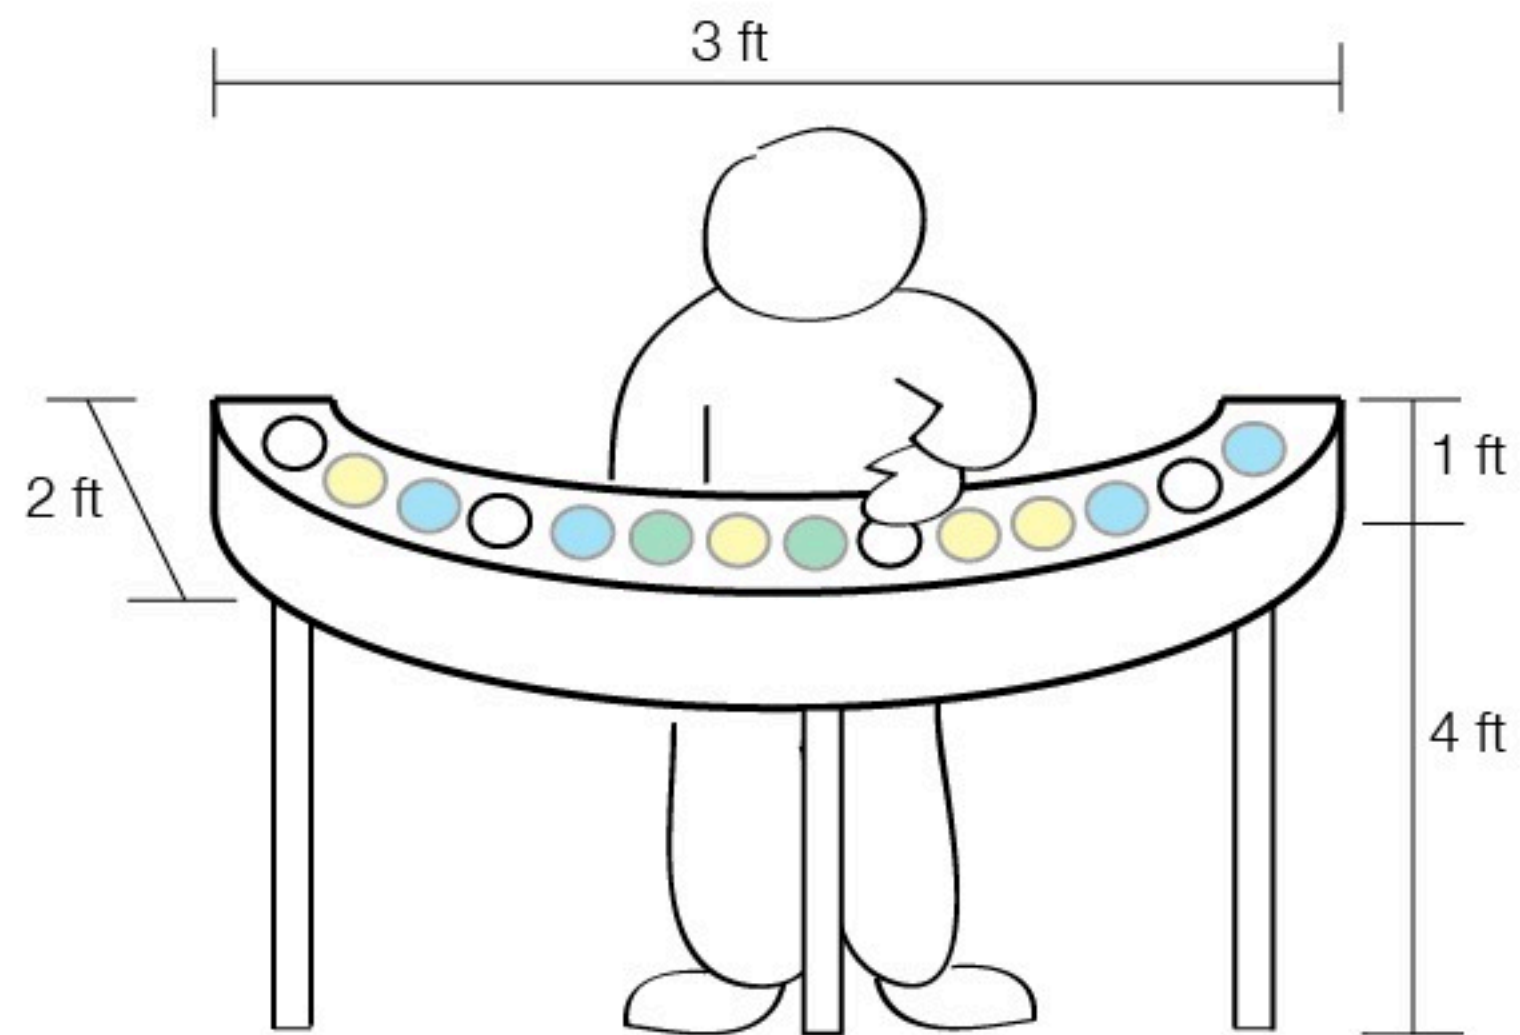

User uses a sweeping motion over the candles to get a survey of the different colors associated with each candle.

User uses an flick up motion with hand to trigger the media linked to the candle allowing him/her to get a better understanding of the intentions & prayers of the community.
